PRESSE RELEASE

Date: 23 april, 2026

Seafrigo commits to energy transition with the integration of its first 5 Volvo FM Electric Trucks

- **Energy transition:** Seafrigo integrates 5 Volvo FM Electric Trucks to its fleet to reduce its carbon footprint and improve efficiency in the Le Havre port area.
- **Trucks adapted for port hauling:** The fully electric Volvo FM Trucks, with a payload of 44 tons and a range of 300 km, meet the requirements of port hauling.
- **Environmental and economic impact:** An 8% reduction in CO₂ emissions and fuel costs, while anticipating regulatory developments.

Le Havre, France:

Seafrigo Group, a major player in logistics specializing in the transportation of food products and cold chain management, announces the integration of 5 Volvo FM Electric Trucks.

These vehicles, the first electric trucks in Seafrigo's fleet, will be primarily dedicated to port hauling in and around the Le Havre. France handhaunters.
