Seafrigo caters to Australian export demand with new state-of-the-art Melbourne facility

- New 10,000 sqm facility is located at Melbourne Airport
- Full range of temperature-controlled zones within the new building
- Facility equipped with biosecurity-compliant infrastructure

Melbourne, Australia

Seafrigo Australia Pty Ltd trading as Mode Logistics across Australia has opened a new state-of-the-art facility at Melbourne Airport, marking a significant milestone in the company's strategic growth and commitment to serving the global food logistics sector.

The new warehouse for the cold chain logistics expert, specialising in food logistics, spans an impressive 10,000 square metres - quadrupling the space of the previous facility and vastly increasing operational capacity. This expansion allows Seafrigo Australia to handle precool units more efficiently, ensuring smoother processing and extended loading windows for both day and night operations.

"We're no longer a step behind the competition - we're a step ahead," says Jason Farrigie, CEO of Mode Logistics. "The additional space gives us the ability to precool units overnight and again in the morning, helping us meet critical cutoff times and enhance our service."

Seafrigo has strengthened its presence in Australia with a new facility in Melbourne since the beginning of the year!

Seafrigo Australia (MODE Logistics) continues its strategic development with the opening of a new 10,000 m² site, ideally located in the heart of Melbourne Airport. [...]
